

PURE HAZELWOOD™

The Pure Hazelwood Skin Care Products

The following video is about the perhaps lesser known Pure Hazelwood products: **skin care products, enriched with hazelwood extract**. At the moment, two products are available in this collection: the moisturizing lotion and the zinc ointment. Let's take a look at the differences between those two products.

First, **the moisturizing lotion**, enriched with hazelwood extract, is non greasy and lightly perfumed. It is paraben-free. Our clients use it to improve the overall appearance of their skin, which may be dry or irritated, and it can be used at all times since it penetrates very quickly.

As for **the zinc ointment**, also enriched with hazelwood extract, it is a natural healthcare product approved by Health Canada to treat diaper rash. It is thicker when you apply it. Dermatologically tested, without any dyes or fragrances, it suits even the most sensitive skins. You can apply it two or three times a day, directly on the affected areas, as needed.
